

**A.W.F. Specialist Maintenance Systems Ltd.**

**NEW PRODUCT**

**Concrete Repair Systems**

**Rapid C.R**

**Rapid Quickset**

**Rapid C.W.C.**

**Rapid Set-Polymer  
Patch Repair**

### **Rapid C.R.**

**Rapid C.R.** Is a two pack repair system designed to repair concrete in Minutes, **Rapid C.R.** has no critical mixing ratios. And the system will bond and adhere to damp surfaces. Easy to use and feather off. Non Toxic - Non Tainting. Cures in minutes. Can be applied to a damp substrate

### **Rapid Quickset**

**Rapid Quick Set** is an easy to use cementitious repair system designed for speedy and effective repairs to concrete, even in wet conditions. No complicated mixing (Just add water). Cures in minutes. Easy to apply.

### **Rapid Water Plug**

- Instant setting repair compound
- Will seal against active water
- Ideal for sealing cracks & joints
- Exception structural strength

### **Rapid C.W.C.**

**Rapid CWC** is a high performance polymer modified cementitious compound designed to provide a barrier against subsurface water. An outstanding waterproofing compound. This unique blend forms insoluble crystalline complexes within fine shrinkage cracks and capillary tracks within the concrete to form a water resistant barrier that resists hydrostatic pressure of up to 7 bar. Ideal for sealing sub-surface concrete walls.

### **Rapid Set-Polymer Patch Repair**

**Rapid Set-Polymer Patch Repair** is a heavy duty ultra-rapid setting, polymer modified; cement based concrete floor repair material designed for:  
Factories, Warehouses, Cold Stores, Dairies, Yards etc
