NEW PRODUCT

Glazecoat S.P.

Glazecoat S.P. applied to Thermal Blocks

A High performance water Based Coating is a acrylated vinyl acetate based copolymer emulsion developed for use in the most demanding of interior paint systems. It has been designed to impart toughness, durability and water resistance to paint films.

A ready-to-use airless spray can be applied by brush or roller, tough elastomeric coating system, formulated to provide effective protection from mould and bacteria in sterile and other sensitive areas.

COLOURS

High Performance Water Based Coating is available in white as standard ex stock.

- White BS code 00E55
- Broken White BS code 10B15
- Patel Green BS code 12B15
- Mint BS code 14C31
- Platinum Grey BS code 22B15
- Ice Blue BS code 18E49

COVERAGE

Approximate 5m²/1.0kg/coat

PACKAGING

1.0kg units 2.5 kg units 5.0 kg units 10.0 kg units

ADVANTAGES - Key Benefits

High durability, Toughness and flexibility, Superior water and weather resistance, Low dirt pickup
Strong adhesion, Excellent scrub resistance, Low coalescent demand, Fast cure - Fast track application
Contains Biocide - effective against a wide spectrum of micro – organisations, Water based, Low odour
