

AWF IMPRUVISE

AWF Impruvise is a unique repair material that is clean, safe and very easy to use.

There is no messy mixing and AWF Impruvise is safer than conventional glass fibre because glass fibre particles cannot escape during application or curing.

All surfaces should be clean, dry and free from dust, oil, grease, wax or any loose material.
Clean surfaces with brush or cloth.

No mixing is required. Simply cut Impruise
To shape with scissors or a craft knife.

Curing is by exposure to UV light (daylight)
after 5 – 10 mins. The use of a UV light in
dull or dark conditions is recommended.

N/A

APPLICATION DETAILS.

Brush

Peel off the backing paper from AWF Impruvise and press firmly into place. Mould it exactly as you want.

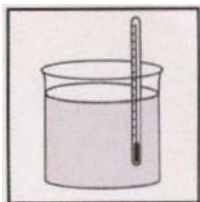

Roller

Coverage

N/A

Minimum Cure
Temperature

N/A

Store in a dry, warm environment
