

Safe-Grip (Ladder Safety Rungs)

Designed specifically to fit over traditional steel ladder rungs, Safe-Grip enhances ladder safety by enlarging the surface area for foot contact and friction coefficient with its integral grit surface. Constructed from durable chemical resistant fibreglass, Safe-Grip is capable of withstanding the busiest of environments and will resist chemical attack from corrosive fluids transferred from the sole of the boot.

Benefits of Safe-Grip

These unique fibreglass slip resistant ladder rung covers are formed to fit over the rungs of fire escapes, service ladders and the majority of all other types of access ladders.

- Permanent slip resistancy in most environments
- Exceptionally hard wearing integral grit surface
- High visibility safety yellow as standard
- Maximum safety even when oily and wet
- Quick and easy to fit - Minimum downtime
- Cost efficient solution to ladder safety

Dimensions and fixings

Safe-Grip, as standard stock items, measure either 25mm x 25mm x 25mm or 38mm x 38mm x 38mm and will fit over the majority of industrial ladder rungs. Safe-Grip can be cut to the required length, free of charge. Bespoke sizes are available, however delivery periods may need to be extended. Safe-Grip is bonded to the existing steel rung using a high quality polyurethane structural adhesive.
