

## **A.W.F DEGREASER**

A.W.F. Degreaser is a highly effective alkaline liquid emulsion cleaner containing a pleasantly aromatic solvent. It is designed for the cleaning of dirty, oily and worn concrete floors in factories, workshops, garages, assembly shops and similar areas that see heavy usage. It can also be safely used for the degreasing of metal components and assemblies.

The area to be treated must be clean, dry and free from any oily contamination before coating commences.

## APPLICATION DETAILS

Pour the degreasing solution onto the floor area to be treated and thoroughly scrub into the surface. This process is best effected by using an electric floor scrubbing machine. Leave the treated area for 10 minutes and then wash or hose off the emulsified dirt and grease. Excess liquid can easily be removed using a squeegee, mop or suitable vacuum cleaner for wet surfaces.

Please note that it is essential that the floor is allowed to dry out completely after degreasing and prior to application of a floor covering, coating or mortar repair.

N/A

Ensure that the surface is above 10°C

Store in dry conditions.

As long as good practice is observed, AWF Degreaser can be safely used.  
Ensure adequate ventilation.  
In case of contact with skin, wash immediately with plenty of soap and water.  
Plastic gloves and eye protection should be worn when handling the material.  
A fully detailed Material Safety Data Sheet is available on request.
