

A.W.F. QUICK MIX RUBBER 85

Quick Mix Rubber 85 is a twin pack rapid cure system, no mess, extremely strong Shore A Hardness which is capable of adhering to most clean surfaces. For the quick repair to virtually any rubber item, the Quick Mix System is the easy answer.

Preparation

All surfaces must be free from contamination. It is advisable to use AWF All Purpose Cleaner prior to applying Quick Mix Flexible Rubber.

Because of its unique rapid cure, all repairs should be fully prepared before application begins.

Mixing Ratio

N/A

Curing Time

2 minutes at normal temperature

Pot Life

N/A

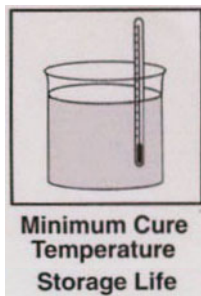

APPLICATION DETAILS

Because the Quick Mix system uses a unique mixing nozzle, no tools are required.

The flexible rubber can be spread with a plastic spatula if required. If the flexible rubber is left for more than one and a half minutes in the mixing nozzle, a new nozzle must be used.

4 linear mts long at a 4mm bead

5°C

160°

24 months in unopened containers

Rubber gloves are recommended but no other special requirements.

A fully detailed Material Safety Data Sheet is available on request

NOTES:

Quick mix flexible rubber systems have excellent chemical resistance to virtually all acids/alkalis in spillage and occasional contact situations
